## Question: 1

Which feature of IBM Security Verify SaaS v1 Administrator facilitates the integration of custom applications and services?

- A. Identity Provider
- B. Security Assertion Markup Language (SAML)
- C. Developer Portal
- D. Federation Gateway

Answer: C

Explanation: The Developer Portal in IBM Security Verify SaaS v1 Administrator is designed to support developers in integrating custom applications and services. It provides documentation, tools, and resources to help developers incorporate identity and access management functionalities into their applications.

## Question: 2

Which feature of IBM Security Verify SaaS v1 Administrator allows administrators to automate user provisioning and deprovisioning?

- A. Role-Based Access Control (RBAC)
- B. Identity Governance and Administration (IGA)
- C. User Lifecycle Management
- D. Access Management Policies

Answer: C

Explanation: User Lifecycle Management in IBM Security Verify SaaS v1 Administrator allows administrators to automate user provisioning and deprovisioning processes. It enables the efficient management of user access

throughout their lifecycle, including onboarding, role changes, and offboarding.

### **Question: 3**

Which protocol does IBM Security Verify SaaS v1 Administrator use for identity federation with external systems?

- A. OAuth
- B. OpenID Connect
- C. Security Assertion Markup Language (SAML)
- D. Lightweight Directory Access Protocol (LDAP)

Answer: C

Explanation: IBM Security Verify SaaS v1 Administrator uses the Security Assertion Markup Language (SAML) protocol for identity federation with external systems. SAML enables secure exchange of authentication and authorization data between the identity provider and service provider, allowing users to access multiple systems with a single set of credentials.

### **Question: 4**

Which component of IBM Security Verify SaaS v1 Administrator enables administrators to manage user roles and permissions?

- A. Identity Provider
- B. Security Assertion Markup Language (SAML)
- C. Security Management Console
- D. Federation Gateway

Answer: C

Explanation: The Security Management Console in IBM Security Verify SaaS

v1 Administrator allows administrators to manage user roles and permissions. It provides a centralized interface for configuring and controlling access to various resources and functionalities within the system.

### **Question: 5**

How does IBM Security Verify SaaS v1 Administrator handle user consent for data processing?

- A. It automatically obtains consent from users during the registration process.
- B. It requires administrators to manually gather consent from users.
- C. It relies on the consent management capabilities of external identity providers.
- D. It doesn't handle user consent as it is not required for SaaS deployments.

Answer: C

Explanation: IBM Security Verify SaaS v1 Administrator relies on the consent management capabilities of external identity providers. When users authenticate through an identity provider, the consent process is typically handled by the identity provider, which may prompt users to grant or deny consent for data processing activities.

### **Question: 6**

Which of the following features in IBM Security Verify SaaS v1 Administrator allows administrators to generate and view reports on user activity and system events?

- A. Event Logs
- B. User Logs
- C. Audit Logs
- D. Error Logs

Answer: C

Explanation: Audit Logs in IBM Security Verify SaaS v1 Administrator provide administrators with the ability to generate and view reports on user activity and system events. These logs track actions performed by users and record important events for compliance and security purposes.

### Question: 7

Which security control in IBM Security Verify SaaS v1 Administrator helps protect user accounts against unauthorized access attempts?

- A. Account Lockout
- B. Intrusion Detection System (IDS)
- C. Network Firewall
- D. Session Management

Answer: A

Explanation: Account Lockout is a security control in IBM Security Verify SaaS v1 Administrator that helps protect user accounts against unauthorized access attempts. When a specified number of failed login attempts occur within a defined time period, the account is automatically locked, preventing further login attempts until it is unlocked by an administrator.

### Question: 8

Which capability of IBM Security Verify SaaS v1 Administrator enables administrators to enforce strong password policies?

- A. Single Sign-On (SSO)
- B. Multi-Factor Authentication (MFA)

- C. User Self-Service
- D. Password Policy Enforcement

Answer: D

Explanation: IBM Security Verify SaaS v1 Administrator provides administrators with the capability to enforce strong password policies. This feature allows administrators to set requirements such as minimum password length, complexity, expiration, and password history, enhancing the overall security of user accounts.

### Question: 9

Which feature of IBM Security Verify SaaS v1 Administrator allows administrators to manage and secure access to web applications?

- A. Identity Provider
- B. Single Sign-On (SSO)
- C. Application Gateway
- D. Application Programming Interface (API)

Answer: C

Explanation: The Application Gateway in IBM Security Verify SaaS v1 Administrator allows administrators to manage and secure access to web applications. It acts as a reverse proxy, enabling centralized authentication and authorization for applications, enforcing security policies, and providing a secure gateway for user access.

# SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

*Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:*

**Actual Exam Questions:** *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

**Exam Dumps:** *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

**Practice Tests:** *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

**Guaranteed Success:** *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

**Updated Content:** *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

**Technical Support:** *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
